

User roles, hierarchy & system flow

LGB Services has **4 active login roles**. Internal users can also have **permission flags** — overlays on Admin / User, not separate roles.

Terminology in this doc: - **Sec (internal)** = secretarial staff only (User role without approval hats: Ng Poh Li, Siti, Nadia, etc.) - **External** = everyone who is **not** sec — client companies **and** LGB non-sec people (head secretary, CFO, division approvers, etc.)

Full document (PDF): [USER ROLES.pdf](#)

Regenerate PDFs: `python3 docs/build-user-roles-pdf.py` (from repo root)

1. Active roles (4)

#	Role	Side	Scoped to	Typical UI
1	Admin	LGB	All customers	Dashboard, customers, packages, admin, workflow config
2	User	LGB	Jobs assigned to them	My work tracker, assigned package lines, forms
3	ClientAdmin	Customer	One CustomerId	Client portal, packages, team & signatories
4	ClientSignatory	Customer	One company + their name on forms	My documents only

2. Internal permission overlays

Flag	Who typically	What it does
CanApproveMoiIntake	Sharon, intake approvers	Review client-submitted MOI; sign-off or reject
CanApproveMoi	Sharon	MOI sign-off after client submission
CanRecommendMoi	Division recommenders	Recommend MOI after sec prep
CanApproveMoa	Sharon	MOA head review, release to signatories, MOA pack approval
IsInternalSignatory	Named LGB approvers	Optional workflow step assignees (when sequential MOA UI enabled)

3. Account holder flags (customer creation)

Checkbox	When they act
MOI	Fill / submit the MOI form
Needs MOI Approval	Approve the MOI before LGB sees it (client phase)
MOA	Sign the MOA when released for sign-off (parallel; all required)

4. End-to-end pipeline (implemented)

1. Role hierarchy (4 roles + permission overlays)

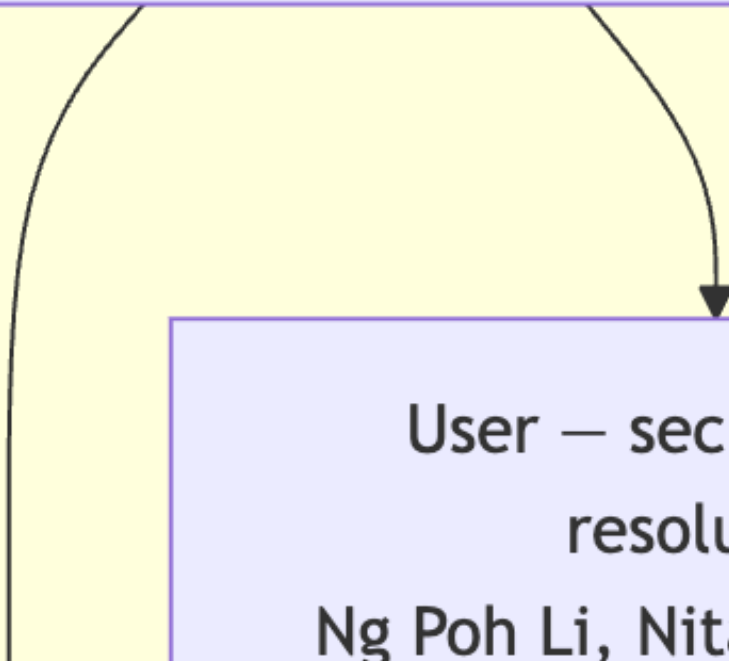

LGB INTERNAL

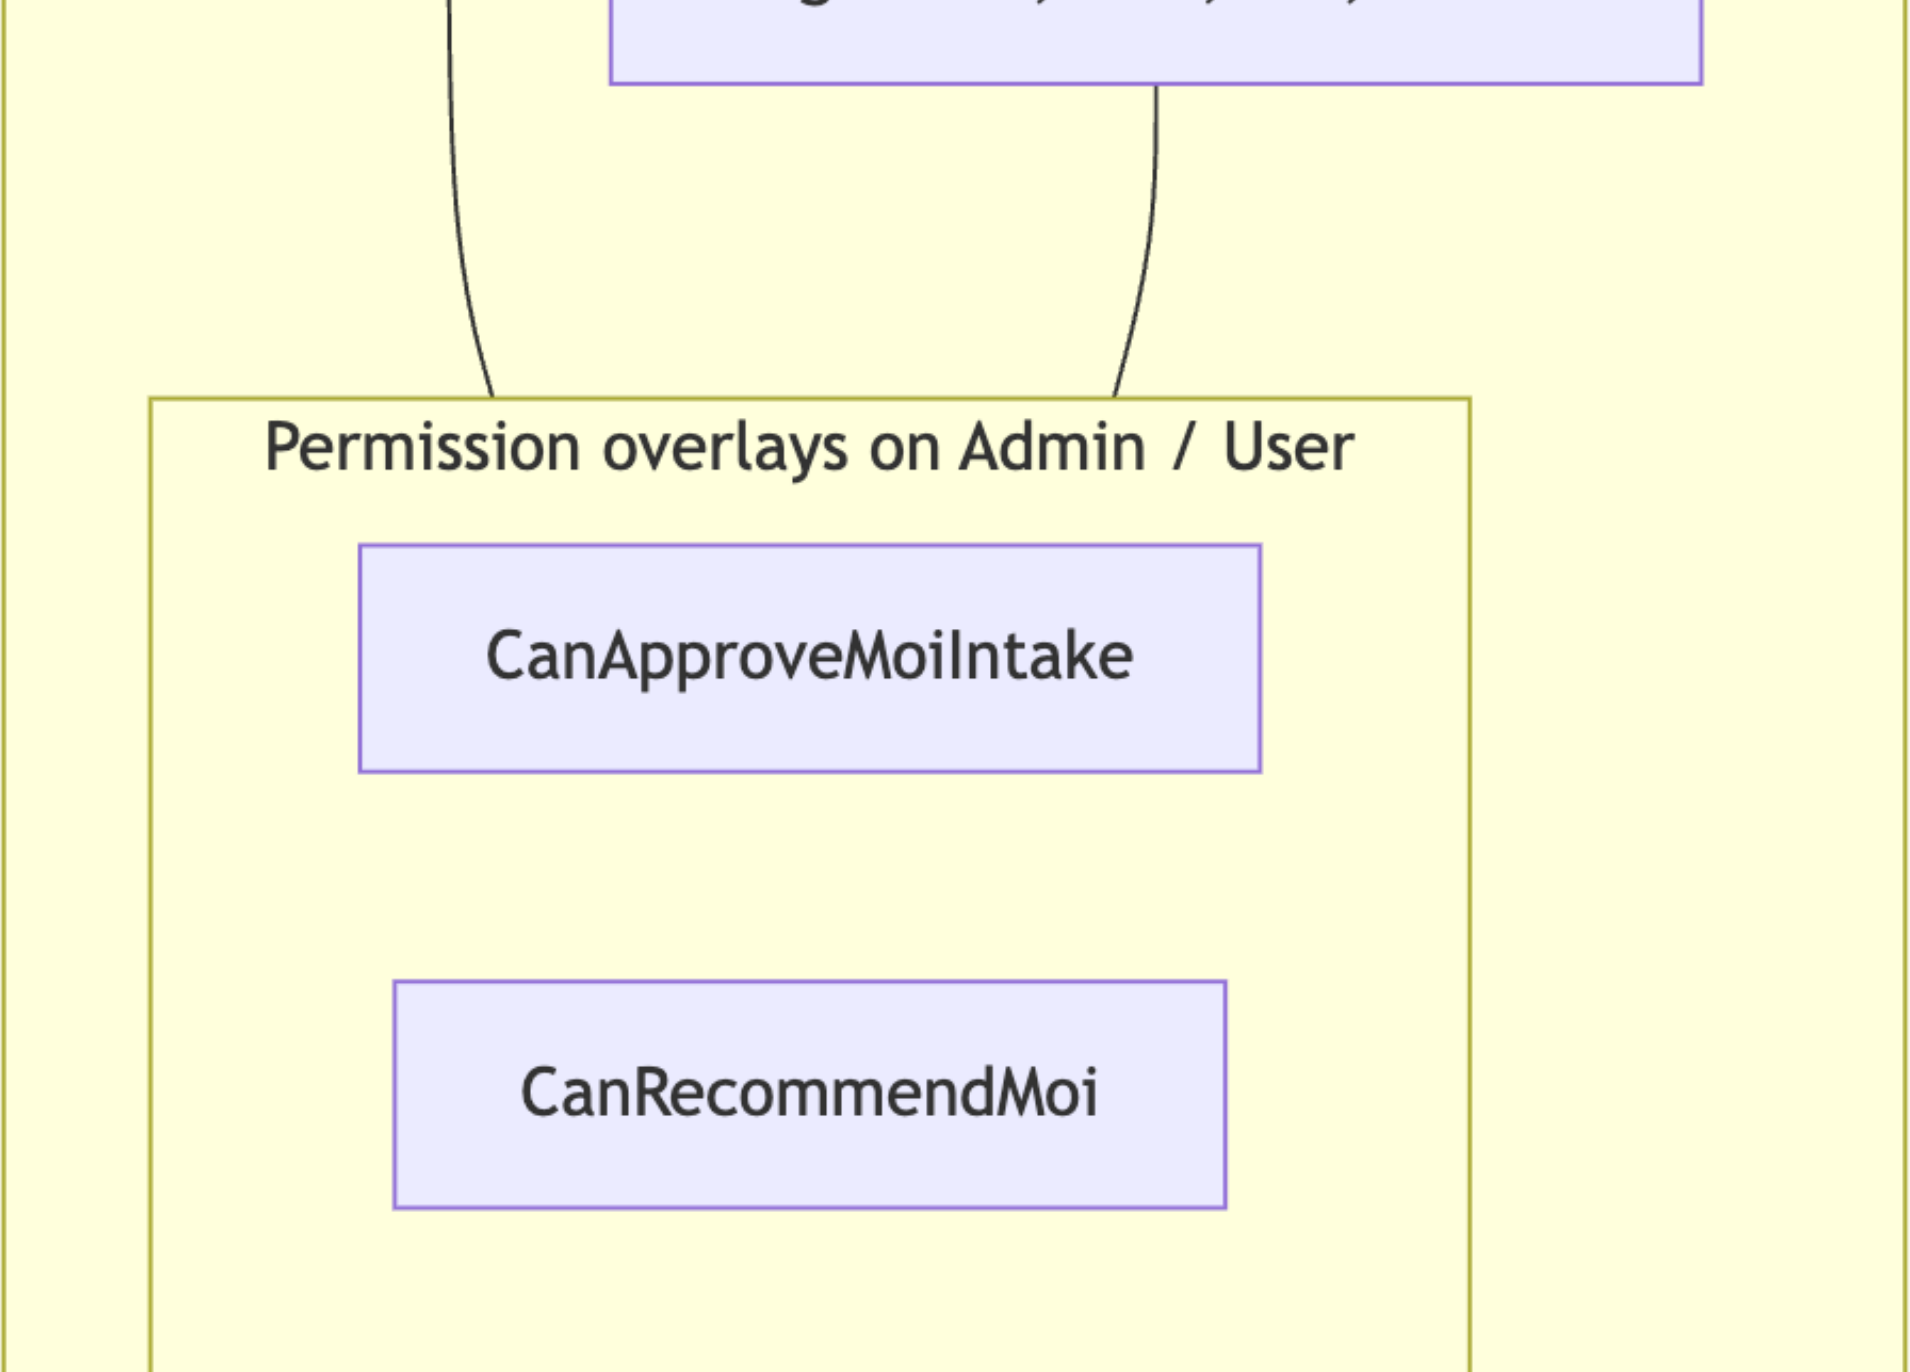

Admin

Sharon – all customers,
packages, users, workflow
config

User – secretarial /
resolution

Ng Poh Li, Nita, Siti, Nadia

Permission overlays on Admin / User

CanApproveMoiIntake

CanRecommendMoi

CanApproveMoi

CanApproveMoa

IsInternalSignatory

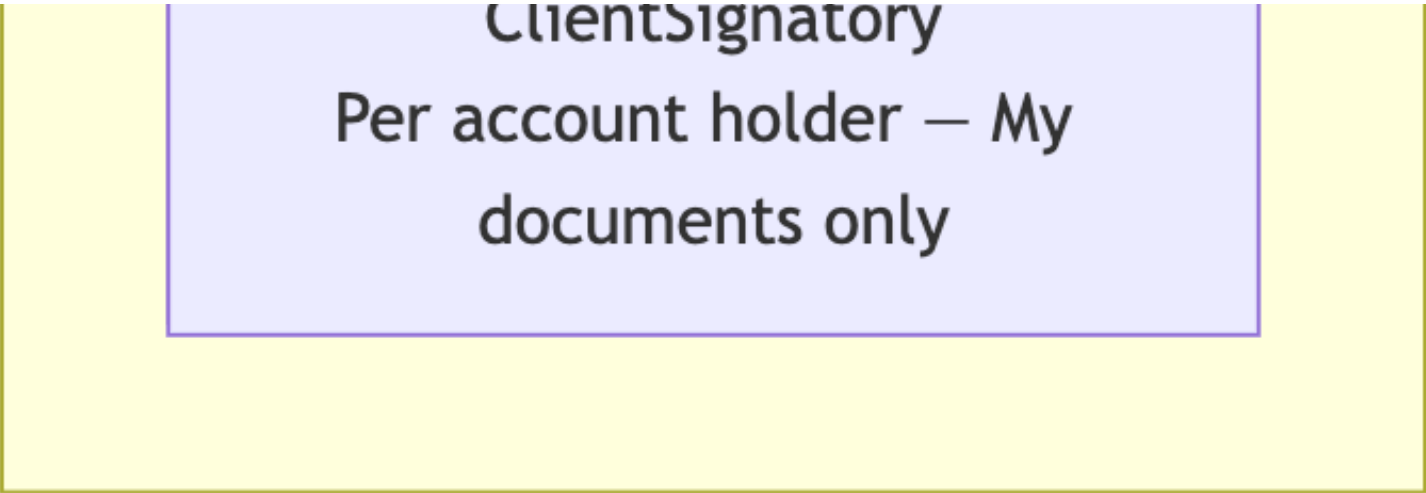

```
graph TD; A[ ] -.-> B[creates & manages]; B -.-> C[CUSTOMER EXTERNAL — scoped by CustomerId]; C --> D[ClientAdmin  
Auto per company —  
portal, issue MOI, team]; D --> E[ClientSign];
```

creates & manages

CUSTOMER EXTERNAL — scoped by CustomerId

ClientAdmin
Auto per company —
portal, issue MOI, team

ClientSign

Client Signatory
Per account holder – My
documents only

There is no separate “execution” phase. When all required MOA holders have signed, the package line is **Completed**.

5. Step-by-step (display status)

Step	Status (examples)	Primary actor
Package synced	MOI not received	Admin creates customer
Client starts MOI	MOI not received / draft	ClientAdmin + MOI holder
Client MOI approval	Pending client approval	MOI approval holders
Submitted to LGB	With LGB for review	—
MOI sign-off	Assign secretarial team	CanApproveMoi / intake
Sec assigned	Resolution prep	Admin assigns sec team
Sec prep	Resolution prep / Pending recommendation	Sec (User)
MOA pack	MOI approved (internal)	Sec prepares MOA
Head MOA review	MOI sign-off (internal)	CanApproveMoa
Released	Ready for MOA	CanApproveMoa
Client MOA sign	MOA circulation	MOA-flagged account holders
Done	Completed	Last MOA signature

6. MOA workflow templates (Option C)

- **Division group** sets default template (MOA_NO_LOA, MOA_WITH_LOA, MOA_SWM).
- **Customer** may override via **MOA workflow template** on create/edit.
- Template + MOA form flags (financeRelated, bankSignatory, LOA) control which approval **sections** appear on the MOA form.
- **MOA holders** (customer creation checkbox) sign in parallel via client portal; all required signatures → **Completed**.
- Admin may edit templates under **Settings → Workflow config**.

7. Customer onboarding

- Packages from catalog or **Add-ons only** (non-COSEC).
 - Optional **package fee override** per row.
 - Auto ClientAdmin + ClientSignatory accounts from account holders.
 - Billing parties (Invoice By / Charge To).
-

8. Seed accounts (Development)

Password: password123 (change on first login).

Email	Role
sharon@lgb.test	Admin — MOI sign-off, MOA review, assign sec
ngpohli@lgb.test, siti@lgb.test, etc.	User (sec)
clientadmin@acme.test	ClientAdmin
dra@lgb.test, dra2@lgb.test, dra3@lgb.test	ClientSignatory
